

1. Notes

This electrical product is specially designed for the room condition and door bell switch of hotel. This simple style item adopts high-lite LED and microswitch. The indicator is clear and the sense of pressure of door bell is good. And the method of wiring is simple and convenient. With the very low power of indicator, it can greatly have energy saving and environmental protection.

2. Technical parameters

Rated voltage: 220V~; 50/60Hz
 Rated current(door bell): 3A/250V~
 Environment: Temperature 10~45°C; Humidity 20%~95%
 Power Consumption of indicator: 1W(max)

Note for indicator control: Connect the switch panel as per wiring diagram and close the corresponding indicator of switch, then the corresponding indicator will be on.

Note for door switch: The wiring terminal K1 and K2 are the connection of the two switches and can only be used for on and off. Should connect as per the wiring diagram. The power supply of the connected doorbell should be based on the actual power supply voltage of the doorbell

Note: Please install strictly as per the wiring diagram in case of short circuit which would damage the panel of switch.
