

Instructions for product usage

T&J

1.Function

- 1.Compared with the ordinary inductive governor, the ceiling fan electronic speed switch has the characteristics of small size, low heat generation and high efficiency. This product is safe and reliable, and has remarkable energy saving effect. It is an ideal choice for home, shopping malls and school offices.
- 2.Rotary high speed, medium speed, low speed, stop these 4 gear adjustment, easy to operate
- 3.Stop gear can completely shut off the circuit and ceiling fan power, which is quite safe and trouble-free
- 4.Standard 86 box panel for easy wiring and easy installation

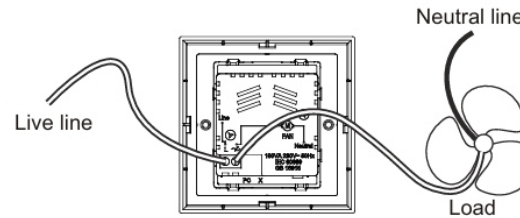

2.SPEC

Rated voltage : AC230V 50HZ
Rated power : 100VA (max)
Control way : Voltage amplitude adjustment
Load type : AC ceiling fan
Atmosphere : -10℃ ~ 40℃

3.Usage method

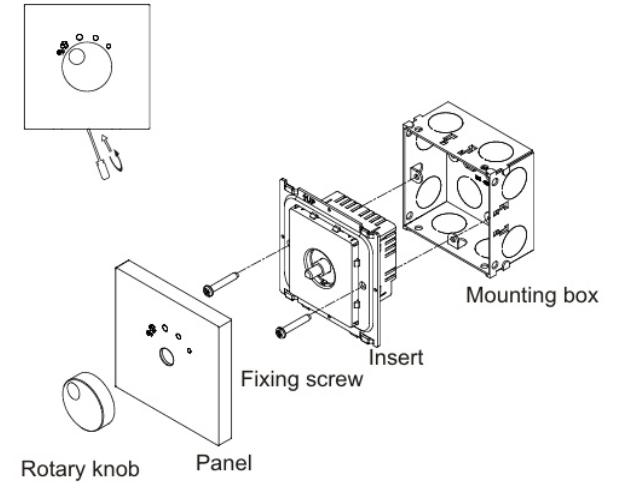

Please refer to terminal diagram and connect correctly this product with ceiling fan. It is not suitable to use this product as special fan or other appliance for Speed regulation
